

# Upgrade your business with an instant tax write-off

Could your business benefit from a more efficient packing system?

What if we told you that the system was an instant tax write-off also?

Meet the semi-automated PacStation.

**Phone: (07) 3822 3811**

## How could a semi-automated PacStation benefit your business?

A semi-automated PacStation with its semi-automatic carton erecting, manual product placement and fully automatic tape sealing, is a great first step towards total packing automation. You may, at first, believe your business does not yet require a PacStation due to its small size or the manual help you receive from friends and family members with packing your items. You should, however, consider the time and manpower you waste hand erecting cartons and think about how that time and energy could be better utilised elsewhere in your business. Just think of how you could better spend your time if you dramatically reduce your carton packing! You could contact new clients, develop new marketing ideas or even just have some time to relax!

## More info?

For more information about investing in a semi-automated PacStation and its tax benefits, do not hesitate to contact a member of the PacPro team today, why wait to advance your business?

We have the expert knowledge to help you improve the efficiency of your business and the quality of your packing.

### INSTANT TAX WRITE OFF

Good news, the threshold for instant asset write-off has been extended to June 2020, meaning assets that are purchased for less than \$30,000 can be claimed as an instant tax write off.

If you purchase multiple semi-automated PacStations, then providing each purchase falls under the relevant threshold, all the assets will be suitable for a tax write-off, benefitting both your pocket and your business.

### DELIVERS FAST ROI

A semi-automated Tape Sealing PacStation delivers a fast return on investment, so don't worry you can expect to see a return in as little as 3 to 6 months!

Although the financial payoff may take a few months, you can expect to see other benefits of the semi-automated PacStation instantly such as packaging that looks more professional and can be produced much more efficiently.

### PERFECT PARTNER

If you are a small business currently hand erecting cartons yourself, a semi-automated PacStation will make the perfect addition to your business operations.

The machine itself takes up around 6 metres of floor space and has been designed on castors, meaning it can be conveniently moved between multiple packing lines, or pushed against a wall or into a storage cupboard when not in use. Only one operator is required to work the machine, making it ideal for small businesses with a limited number of employees.
